TITLE: Oil supply nozzle structure for
fibre in processing line
- has outlet side of guide groove
which is detachable from ceramic guide pin, separated
from it by gap

ABSTRACTED-PUB-NO: JP 10077522A

BASIC-ABSTRACT:

The structure includes a guide groove (11) formed on fibre (20). The oil supply nozzle is made of ceramic which has an oil supply opening (12), leading

to the entry side of guide groove. The outlet side of guide groove is detachable from a ceramic guide pin (15) separated from it by a gap (D).

ADVANTAGE - Reduces sliding friction. Eliminates change of entire nozzle.
Adjusts amount of adhesion of oil to fibre by adjusting gap between guide groove and pin.
